 +Appointed December 21, 1925, in place of Charles E. Davis, resigned. Elected March 2, 1926.

Report of the Mayor

To the Citizens of Rutland:

In submitting my report for the year ending December 31, 1927, I do not deem it either advisable or necessary for me to go into a detailed analysis of the reports of the heads of our various city departments. Their individual reports are included herewith. You will find that they are very much in detail, very clear and very comprehensive. If any taxpayer will analyze these reports carefully, I think he will be satisfied that the money of the city has been spent to the best possible advantage during the past year.

I would, however, call your attention to the fact that during the year 1927 the city purchased about 2,200 acres of land on the watershed at a cost of \$45,071.67; a house in the town of Mendon, which is occupied by the watershed caretaker, at a cost of \$608.56; two new Mack trucks costing \$9,280.00; one Holt tractor costing \$2,925.00; one self-erecting ladder truck for the Fire Department costing \$15,000.00. All of these items, amounting to nearly \$73,000.00, I consider unusual expenses developing from circumstances existing just at this time and not to be met with every year.

At the same time, we have a cash balance for the year 1927 of \$40,112.12, as per our Treasurer's Report, to which should be added \$13,460.26 for flood damage repairs, an item which I expect will be refunded to us by the State.

Taken all in all, I believe the city reports make a very creditable showing in the operation of the various departments for the year 1927.

It has occurred to me that, in the minds of some people, my predecessor, Mayor Dunn, has not been given due credit for the organization which he developed during his administration. I have found the heads of all the departments of the city government to be very conscientious in their work and desirous of doing

what is best for the city as a whole. I have had full co-operation and support from them and also from the Board of Aldermen. All branches of the city government have worked as a unit and we have had good "team work" throughout the year. There has been no friction of any kind.

I trust that the detailed department reports will have your careful perusal and consideration. All phases of the city's activities during the past year are authoritatively and comprehensively discussed. They furnish a complete review of the conduct of the business of the City of Rutland for the year 1927.

Respectfully submitted,

ARTHUR W. PERKINS,

Mayor.

Report of the City Treasurer

Gentlemen:—I herewith present to you my report as City Treasurer for the fiscal year ending December 31, 1927:

RECEIPTS

Taxes received by City Treasurer	\$485,440 40
Water, schedule rates	25,007 23

The items charged in the department of public works account make up the charges that appear in lump sums at the end of the street, sewer, sidewalk, general and water accounts, the department of public works account being used for convenience in charging items that could not properly be distributed until the end of the fiscal year. A detailed statement of these transfers is on file in the office of the commissioner of public works.

Report of the Commissioner of Public Works

To the Honorable City Council:

Gentlemen:

In accordance with the provisions of the City Charter I submit the Annual Report of the Commissioner of Public Works for the year ending December 31, 1927.

ORGANIZATION

Office:

Commissioner of Public Works—R. H. Royce.
 City Engineer—R. H. Royce.
 Superintendent of Streets—R. H. Royce.
 Assistant City Engineer—E. L. Tracy.
 Assistant City Engineer—W. K. Nichols.
 Clerk—L. E. Hinekley.

Outside force:

General Superintendent—James McLaughlin.
 Construction Foreman—John Conner.
 Carpenter Foreman—Joseph Mahar.
 Chief Mechanic—Carlos Colvin.
 Sewer Foreman—Joseph Stacey.
 Paving Foreman—Leslie Gray.
 Sidewalk Foreman—John Howard, Jr.

Water Department:

Superintendent—E. S. Beardsley.
 Foreman—E. Gallagher.
 Foreman—J. Reilly.
 Foreman—F. Lynch.

The following main departments are under the general supervision of the Commissioner of Public Works:

1. The Street Department.
2. The Public Works Account.
3. The Sewer Department.
4. The Sidewalk Department.
5. The General Department.
6. The Water Department.

The sources of revenue, the functions and the sub-divisions of each department for purposes of accounting and administration are as follows:

For the year 1927:

1. Streets.

(a) Miscellaneous. This received its funds from the state law giving 20 cents on the dollar of the grand list, which amounted to about \$27,000 this year. This has to take care of about 50 miles of streets covering general maintenance, grading, rolling, Truck, tractor and road machine operations, oil, calcium and water sprinkling, snow plowing, snow removing, street cleaning, cold patching, curbing, gutters, survey lines, grades, etc.

(b) Gravel Roads. This was financed by an appropriation from the general fund to the Street Department.

(c) Crusher Bins. This was financed by an appropriation from the general account to the Street Department.

(d) Permanent Roads. This was financed by an appropriation from the general account.

(e) Stone Crusher. This has no special appropriation but is operated by the Street miscellaneous account and stone sold to other departments or sub-departments is credited back to the Street miscellaneous account.

2. The Public Works Department. This is merely a stock account to which items not chargeable at the time of expenditure

to any one department are charged and then charged against each department as used. This account balances off at the end of the year and its transactions in detail are shown by monthly interdepartment statements.

3. The Sewer Department.

(a) Sewers, Bond. This is financed by a bond issue authorized in 1923 to provide \$10,000 annually for the construction of new sewers for 5 years, and may be used only for this purpose.

(b) Sewers, miscellaneous. This is financed by an annual appropriation from the general account to provide for the construction and maintenance of catch basins, man-holes, sewer extensions, etc.

4. Sidewalk Account. This is financed by a bond issue authorized in 1923, which provided \$5,000 annually for the construction of new sidewalks for 5 years. The work to be done on a one-half cost basis with the property owner and the City.

5. The General Account. This is a part of the general city account and is provided for by appropriations to cover the cost and maintenance of parks, dumps, bridges, guardrails, culverts, office supplies, building repairs, etc. Funds are supplied by setting aside from the principal general account specified amounts for each activity.

6. The Water Department is financed by the sale of water to users. This department has supervision over about 3,500 acres of city-owned land outside the city limits, is responsible for the sanitation of about 25 square miles drainage area and the maintenance of about 45 miles of water mains in the city besides the services, hydrants, watering tubs, meters, etc.

The work done by one department for another is billed against and credited to the proper departments by inter-depart-

ment transfers which are totalled each month and incorporated in a financial statement showing receipts and expenditures in all departments. This statement is submitted to the Board each month for their information.

WORK DONE IN STREET DEPARTMENT

Under a special appropriation of \$20,000 permanent paving done this year comprised 2,870 square yards of rock asphalt on Center St. from Wales St. to Main St.; 2,870 square yards of rock asphalt on Washington St. from Wales St. to Main St.; 5,394 square yards of bituminous macadam on Forest St. from Pine St. to South St., including the intersections of Forest St. with Union St., School St., Franklin St., Cherry St., Convent Ave., and South St.; 1,165 square yards of bituminous macadam and 100 square yards of Kyrock on Madison St. shoulders and intersections.

It was planned to finish the sides of Washington St. and Center St. with macadam but as there were no funds available to build the necessary curbs before finishing the edges, the work was postponed until 1928. However, as the money appropriated for this purpose was cancelled contrary to expectations at the end of the year, the plan will have to be modified.

Streets were cleaned in the residence and business sections as usual. Cold patching was done more extensively than in past years and the amount of this work will be increased next year.

The two new Mack trucks which were bought this year have given splendid results and the cost of maintenance has been slight.

The new tractor has given satisfactory service and is indispensable. This was bought in 1926 but paid for in 1927.

Extensive repairs were necessitated on the obsolete stone crusher at Pine Hill, and new concrete bins were built to replace the old wooden ones. About 2,000 tons of stone were crushed.

The Spring break-up in the roads caused by an unseasonable period of hot weather was the worst in many years, and the public was greatly inconvenienced. Grading operations were

started with the tractor, road machine and roller as soon as conditions permitted, and carried on until the ground froze again.

Snow removal and plowing were done as heretofore. Having but one snow plow, it takes nearly four days to plow all the streets. This fall the city bought a blade plow for each of the two new trucks with the expectation that the slower moving tractor could plow the central section of the city while the faster moving trucks were plowing the other streets. It is hoped that we can cover the whole city in a day in this way. Icy streets and walks were sanded as needed.

Water, calcium and oil sprinkling was done this year as in previous years, collections being made from abutting property owners for their share of the cost.

Graveling of streets has been continued. The gravel spread on the streets in past years has ranged in size from sand to rocks 8 inches in diameter. It is impossible to make a decent surface with such material; and at the expense of considerable loss of time and money, the larger stones were removed this year from the gravel at the pit. There should be a portable crusher at the pit and all material excavated made use of. Loading trucks by hand is archaic and should be replaced by power handling.

The maintenance of streets is most important for the convenience of the general public, and with the surface and sub-soil conditions, lack of drainage, etc., on the majority of our streets it requires unremitting work and inspection to keep them passable. Streets have been filled for years, instead of being dug, due to lack of funds and proper equipment and it is time to properly grade and align them. High St. was graded and aligned but before the surfacing gravel was consolidated it was badly washed by the rains in November, as were many other streets. A heavy oil or tar treatment on some of our streets will, I think, give, with slight maintenance, a cheap and effective surface for several years.

The acceptance of new streets was given serious consideration this year and finally resulted in the adoption of a regulation restricting the acceptance of a new street until sidewalks and

rough grading had been done in accordance with a plan approved by the City Engineer, the total expense being borne by the property developer. We have miles of streets ungraded, the roadways not aligned, with no legal line or grade established, no plan or record of them, no assurance to a purchaser that the grading he does on his own property will conform with the ultimate street grade, no definite space allocated to water, sewer and gas pipes—nor for other public service utilities—and largely the result of laying out streets by land developers who are more interested in unloading a plot of lots than in the future convenience of the persons who buy the lots. There is a decided tendency on the part of some individuals to attempt to profit at the expense of the other taxpayers, by purchasing land in an unimproved and remote section very cheaply and then demanding that a large share of the street money be spent to make a road to their home, to say nothing of the sewer and water expenditures also required. The average person does not realize that the annual street appropriation as provided for by law is only about $5\frac{1}{2}$ to 6% of the total taxes collected and that any increase over this amount has to be met by special appropriations, and that the many demands on this sum do not permit the building of new streets. Nor should the city be expected to do so. It is not customary in other cities. The City of Burlington no longer accepts new streets until water, gas, sewer, curbs, sidewalks and rough grading have all been completed without expense to the city. The real estate developers can get back their money if they improve the streets before selling and add the improvement costs to the sale of the lots.

The city streets, especially the hill streets, are badly in need of curbs and gutters. Up to now there have been no funds provided for their construction.

While the defects in the streets are especially evident to one who is constantly inspecting them, there have been many marked improvements made in the last few years.

The flood of November 3rd raised havoc with our unimproved streets through erosion and by soaking them so full of water that they were cut to pieces under the traffic. There will be

much work to be done next spring on many roads that usually come through the winter in good shape but are now broken up badly.

SEWERS

Work Done in the Sewer Department.

Spruce Street—The sewer in this street from South Street southerly had long been in bad condition and was replaced on the center line of the street from South Street to a point 941 feet southerly. The sizes of pipes are as follows: starting at the existing manhole in South Street, thence southerly 191 feet of 15-inch pipe to a new manhole, thence 200 feet of 12-inch pipe to a new manhole, thence 208 feet of 12-inch pipe to a new manhole, thence 267 feet of 10-inch pipe to a new manhole, thence 75 feet of 8 inch pipe to a dead end. The old sewer in the street was discontinued and the house connections transferred to the new sewer.

Vernon Street—This sewer commenced at an existing manhole at Lincoln Avenue and was laid easterly on the center line of Vernon Street 435 feet with 15-inch pipe to a new manhole in the center line of Phillips Avenue, thence 240 feet easterly with 15-inch pipe to a new manhole, thence 90 feet easterly with 12-inch pipe to a dead end, making a total length of 765 feet of pipe laid east of Lincoln Avenue center line on Vernon Street center line.

Park Avenue—This sewer was laid to replace an old sewer which for years had caused much trouble and was in bad condition. The new sewer was laid in the same line as the old sewer, which was about 8 feet north of the south line of the street as follows: starting at a new manhole on the intersection of the Harrison Avenue sewer with the Park Avenue sewer, thence easterly 303.5 feet to a new manhole, thence 358.5 feet to a new manhole in or near the center line of Pine Street, thence 346.2 feet to a new manhole in or near the center line of Grove Street, making a total of 1,008.2 feet of 10-inch sewer.

A new 8-inch sewer was laid in Forest Street starting at a new manhole in or near the intersection of the center lines of

South and Forest Streets and running thence southerly in the approximate center line of Forest Street a distance of 424 feet, connecting with an existing 8-inch sewer at this point, which is in front of 118 Forest Street. Also an 8-inch overflow pipe was laid for a distance of 23 feet from an existing manhole at the northwest corner of Forest Street and South Street to the new manhole.

In Pearl Street the existing sewer which ended 33 feet south of the manhole at Pearl Street and Wood Avenue was extended southerly 75 feet with 8-inch pipe.

In Temple Street a new sewer was laid from an existing manhole about 150 feet east of Tremont Street westerly to a new manhole a distance of 430 feet of 10-inch pipe, thence westerly 170 feet of 8-inch pipe to near the east line of Deer Street. This new sewer was laid on the same line as the old sewer, which was so close to the surface that it was crushed in many places and had given much trouble especially in winter through freezing up. This sewer is on the approximate center line of Temple Street.

In Killington Avenue 105 feet of 8-inch pipe was laid easterly from an existing manhole in East Street. This sewer was laid in or near the north gutter line of Killington Ave.

In East Washington Street, 36 feet of 8-inch pipe was laid westerly from the west end of the existing sewer, making the present end of the sewer 24 feet west of the east side of house No. 41 East Washington Street.

In Edgerton Street 75 feet of 8-inch pipe was laid westerly from an existing manhole in Lafayette Street.

In Horton Street 350 feet of 8-inch sewer was laid southerly from an existing manhole in Curtis Avenue. The sewer was laid 20 feet east of the west line of Horton Street.

In Lafayette Street 200 feet of 10-inch pipe was laid northerly starting at a point 100 feet north of the existing manhole at Edgerton Street. This pipe was laid 23 feet west of the east line of Lafayette Street.

In Thrall Avenue 300 feet of 10-inch sewer was laid northerly from a new manhole in Temple Street. This was laid on

the center line of Thrall Avenue and was partly paid for by Charles Novak.

The sewer in White Alley started in 1926 was completed in 1927, the work this year starting 72 feet northerly of the manhole in the north side of West Street and running thence 74 feet northerly with 8-inch pipe to a new manhole, thence running easterly 60 feet to another new manhole. The last manhole will be changed to a catch basin after the ground is graded.

About 30 feet of 8-inch sewer was laid southerly in Coolidge Avenue from the intersection of the existing sewers in Coolidge and Marble Avenues.

In Grove Street 300 feet of 10-inch sewer was laid in the center line southerly from a manhole at Park Avenue to a new manhole, thence 100 feet of 8-inch pipe southerly to a dead end.

In East Center Street 30 feet of 8-inch sewer was laid easterly from the east end of an existing sewer nearly in front of 52 East Center Street.

In Watkins Avenue 50 feet of 10-inch sewer was laid northerly from the existing terminal manhole built in 1922 near the top of the hill.

In the proposed street known as Birchwood Avenue 66 feet of 10-inch pipe was laid westerly from an existing sewer in a proposed street known as Wallace Avenue. This sewer was laid in the center line of Birchwood Avenue.

A sewer was started on Woodstock Avenue from the approximate center line of Tremont Street, thence easterly along the north side of Woodstock Avenue to provide drainage for a new house being built there. The builder of the house offered to dig the trench if the city would furnish and lay the pipe. Work was started on this basis. Because of difficulties encountered in digging, the builder abandoned the work and petitioned the city to complete the work, which will be finished by the city in 1928.

23 manholes were built in 1927.

28 catch basins were built in 1927.

Due to heavy rain storms catch basins filled rapidly with

dirt and considerable work was done cleaning them. Cleaning by hand is a slow and costly process. Before long the city should buy a motor eductor for this purpose.

53 sewer taps were made for house connections.

In March the 18-inch sewer on Baxter Street which has given trouble before north of State Street had to be dug up and many broken lengths of pipe were found and replaced.

The trunk sewer running across Forest Street near School Street and going across private property to Meadow Street, and thence to East Creek, burst again this year, once before and once during the flood of November 3.

Plans were worked out to enlarge this sewer from East Creek to a manhole between Forest and Meadow Streets where another trunk sewer joins it, but were not carried out because of unusual expenses caused by the flood. The general inadequacy of our sewer system is perhaps too well known to be discussed further. The time is coming soon when large expenditures will be necessary. We are constantly adding catch basins. New houses whose roofs drain directly into the sewers, and other drainage improvements are adding a burden to our already overtaxed system which must be provided for in larger outlets. The department receives many complaints from property owners relative to water backing through their connections into their cellars. In many instances this could be prevented by the installation of a back water trap which allows water to go out but not enter the connection. An ordinary installation costs from \$10.00 to 15.00 depending upon labor. The trap itself costs about \$8.00. Oftentimes the house connection or the house plumbing is plugged. If the main sewer is plugged every house above the plug will be bothered, and the backed-up water will show in manholes and catch basins above the plug. In about 9 out of 10 cases when the department is called out the trouble is in the private sewer. The city does not lay or maintain the service between the main sewer and the house, but does make the connection with the main sewer.

Where houses have water in their cellars due to lack of concrete floor, cracks in walls, etc., the answer is obvious.

If the house connection is properly laid and maintained regardless of whether there is a back trap or not, the water will not come into the cellar but will back up through set tubs or toilets. Much time and labor is spent investigating reports of alleged sewer main plugs. There are some conditions that can be improved next year and plans are being made to do so.

SIDEWALK DEPARTMENT

36,962.5 square feet of 4-inch thick, 5-foot wide concrete walks were laid this year by city forces. This is equivalent to 1.40 miles of 5-foot walk. The cost was borne one-half by the city and one-half by the abutting property owners. The flood prevented the completion of the last job contemplated, which was on State Street. There were several walks laid by private contractors for owners who did not wish to wait their turn and the city re-imburshed them for one-half what it would have cost the city to build the walk, payment being made when the owner's turn came to have his walk built.

The precedent established has allowed any owner to petition and have built as little as 50 feet of walk. This is not economy as it takes too much moving around and leaves an isolated piece of walk. If another bond issue for walks is made it should specify not less than 300 consecutive feet or an entire block for any one job.

GENERAL DEPARTMENT

This department takes care of the bridges, culverts, guard-rails, dumps, parks and miscellaneous odd jobs not directly chargeable to any other department. Metal culverts with concrete head walls were installed as follows: two on Stratton Road, two on the Creek Road and one on Lincoln Ave. One metal culvert without head walls was installed on Stratton Road. Guardrails were built on Jackson Avenue and Pearl Street, and extended on Lalor Avenue and other places needing them.

A flat slab 10-foot span concrete bridge was built on Park Street over Mussey Brook.

"76" Bridge on Grove Street over East Creek was jacked up, new sills and rocker arms, planking and bracing were put in. State Street bridge over East Creek required new wooden stringers. The abutments which were in bad condition were covered with gunite. Minor repairs were made on other bridges and culverts. An effort was made to render the city dump less offensive by applying a strong chemical deodorant and by covering putrifying refuse promptly. The results were apparent and the dump has been kept in the most orderly condition this year. It is to be regretted in this connection that some of the residents have so little civic pride as to dump garbage and refuse of all kinds on vacant lots and side streets where the chance for detection is slight.

Clean-up week was carried out this year and seems to be very acceptable. Various signs were placed at different points in the city to aid tourists and met with much favorable comment.

Election booths were moved to and from polling places and some were repaired. Through the courtesy of the Red Cross the city was given the shovels, hoes and steel baskets left after the Red Cross had finished cleaning up cellars after the flood.

A survey was made of Main Street Park in the vicinity of the Band Stand. Concrete posts were set around the Stand and connected with a steel cable to keep the youngsters from swarming over the stand during concerts. Some of the old paths were harrowed and seeded down and others were aligned and covered with crushed stone. The wire fences and signs set up to protect the new grass were torn down by irresponsible hoodlums, who need a little parental discipline.

Many of the trees were trimmed up and this contributed much to the general appearance of the Park.

The unsightly poles and wires in front of the railroad station were replaced by underground service. Plans to co-operate with the railroad to lay new walks to and in front of the station were postponed until next year.

The floor in Fire Station No. 1, which was unsafe, was relaid and strengthened.

Traffic light installations and other work was done by the Department for the Police Department.

More than one-third the expenses in this Department this year was caused by the flood. Plans are being made at the Highway Department for the early replacement of Dorr Bridge with a modern steel structure and an application for State Aid has been sent in for Ripley bridge replacement.

WATER DEPARTMENT

Nineteen new hydrants were installed this year, necessary repairs and alterations made, pressure tests were taken, dead ends blown and hydrants repainted.

Water service was donated to the U. S. Army, when they camped here on their manoeuvres.

Practically all the new mains laid have been in conformity with water distribution approved by the New England Insurance Exchange leading to a reduction in insurance rates.

A 12-inch line was laid from West Street main to Kendall Ave. main in Elm Street, a total distance of 1,700 feet. This replaced a short length of 6-inch, and the rest of the existing 3-inch pipe on that street. Included in this job was 209.5 feet of 6-inch pipe laid easterly from Elm Street on Grant Ave. and eliminating dead end there. The house services on Elm Street were relaid with new pipe.

A 6-inch main was laid on Burnham Ave. from Elm Street 176 feet to eliminate a dead end at this point.

376 feet of 6-inch pipe were laid in Pine Street from Kingsley Court to Park Ave. On Watkins Ave., 75 feet of 6-inch pipe were laid northerly from near 45 Watkins Avenue. On Charles Street a 38-foot extension of 6-inch pipe was laid to Wallace Ave. In Wallace Ave. 300 ft. of 6-inch pipe was laid to Birchwood and 94 feet of 6-inch westerly in Birchwood.

In James Street 190 feet of 6-inch main was laid southerly from South Street, thereby eliminating a dead end. 30 feet of 6-inch were laid in Brown Street northerly from South Street eliminating a dead end at this point.

The east end of Seabury Street main was extended with 36 feet of 6-inch to the Church Street main.

Starting at Marble and Coolidge Aves. 570 feet of 6-inch main was laid northerly in Coolidge Ave. to Dana Ave., and easterly in Dana Ave. to connect with an existing pipe in Dana Ave.

In Deer Street 210 feet of 6-inch main was laid from the main in Temple street to connect with an existing main in Deer Street.

At the more northerly corner of East Street and East Center Street 16 feet of 6-inch main were laid easterly from East Street to connect with an existing main in East Center Street.

The east end of the existing pipe on East Center Street between East Street and Lafayette Street was extended with 60 feet of 6-inch pipe. Just south of the south side of the Post Road the 12-inch and 16-inch supply mains were cross-connected with 18 feet of 12-inch pipe.

In Lafayette Street 267 feet of 6-inch main was laid from the Corner of Lafayette and Charles Streets southerly to a dead end. The 6-inch main previously laid in Litchfield Ave. was extended 70 feet.

Near the east end of North Street as accepted this year a 6-inch main was laid easterly 120 feet from the 12-inch supply main where it crosses North Street.

In Granger Street 16 feet of 6-inch pipe was laid easterly from the 12-inch laid in 1926 to an older 6-inch on the east side of Granger Street.

In North Church Street a $\frac{3}{4}$ -inch line was extended 324 feet.

There were 76 new services laid this year, two of them being special lines for fire protection purposes. The average cost per ordinary service was \$30.80.

There were 54 services relaid or repaired at an average cost of \$26.39.

Meters, curb boxes, valves, shut-offs, reservoir, stockroom, records, interest on bonds, taxes on city-owned land in nearby towns, assisting the City Treasurer, etc., were taken care of as in previous years.

There was some agitation this year relative to a decision of the State Board of Health prohibiting fishing in the streams

that supply the city with drinking water. It was thought by the Board that an occasional typhoid carrier either local or from outside might contaminate the city water supply, and that the possibility of an epidemic would scarcely be compensated for by the pleasure derived from fishing. It was thought that for the one who wanted to fish there were many more who had to drink the water, and that it would be a hardship for few balanced against the safety of many.

The prohibition was duly advertised and the streams were posted. The people who lived in the towns bordering the streams as a whole refrained from violating the restriction. A local man was tried for a violation of the regulation and found not guilty by a jury of his peers. A swarm of so-called sportsmen immediately rushed to the streams and in a short time depleted the brooks of the majority of the trout. The prohibition is still in force but will perhaps not be necessary next year as the flood probably removed what trout were left.

The city draws its water supply from an area of about 25 square miles in extent, and owns outright about 3,500 acres of this land, which it is setting out to trees. 10,000 red pines were set out last fall and 40,000 more ordered for spring delivery.

Following the advice of the Vermont Forest Service, from whom we have had prompt and courteous responses it was decided to sell such standing timber as had reached the point in its development where it ceased to be economical to let it grow further. A contract and specifications in conformity with the ideas of the above service were drawn up and C. F. Willis was awarded the contract to cut all ash 8 inches in diameter 4'-0" high and other timber 10 inches in diameter 4'-0" high on the so-called "Fyles Place."

The land purchased this year consisted of about 2,000 acres formerly owned by M. E. Wheeler and generally known as the Wheelerville property in Mendon, also about 158 acres purchased from Williams and Handley, which include the small dam and pond on the north side of the main Woodstock road west of the Green Mountain Club House. The damage caused by the flood at the head water works has been repaired in part, but there is

a good deal to do next year as soon as the weather permits. A new weir was placed in the intake channel this year, and one was also placed on the Wheelerville Brook above the so-called "Temple Place."

The weir on the Wheelerville Brook could not be read part of the time in October and December because of high water and was carried away by the flood of November, but readings were taken as follows:

Month	Days read	Total Gallons	Average daily
September	30	123,890,000	4,129,666
October	28	143,690,000	5,131,786
November	None		
December	28	152,055,000	5,430,536
	86	419,635,000	

The average flow for 86 days was 4,879,477 gallons per day.

The average year will probably give about 5,000,000 gallons per day flow. These measurements have been made and will be kept over a period of time to afford data relative to the discussion as to the advisability of building a storage reservoir in this vicinity.

The precipitation record taken by Mr. Geo. H. Ross of Rutland is as follows:

Month	Snow	Rain	Total
January	14.2	1.01	1.87
February	13.5	.21	1.61
March	1.6	1.21	1.47
April5	1.01	1.01
May		3.67	3.67
June		1.72	1.72
July		3.71	3.71
August		4.70	4.70
September		1.62	1.62
October		7.37	7.37
November	2.2	11.44	11.47
December	14.0	2.56	4.25
	46.0	40.23	44.47

REPORT OF ENGINEERING DEPARTMENT

Early in the year this department made new tracings of the water and sewer system maps so as to include all changes and additions to the systems. This is done once in every five years.

Surveys were made previous to the paving work on Madison, Forest, Washington and Center Streets so as to establish the line and grade of the permanent roadways. The realignment and grading, followed by graveling, of Harrington Ave. and High Street was also controlled by surveys made by this department.

New sidewalk construction required more engineering work than any other single item. Much thought must be given to the grade and line of the new walks so that they will fit in properly with any possible future street improvements. In a very few cases, line and grade were given to property owners who wished to build their own walks and this was done so that the walk would conform to future sidewalk construction on that street.

A reinforced concrete bridge was built on Park Street over Muzzey Brook, and construction was started on North Main Street and Adams Street bridges, which were destroyed by the flood of November 3rd. These bridges were designed in this office and their layout was properly supervised. Corrugated steel culverts with concrete headwalls were set where small stream lines crossed the roadway and no sewers were available to take the drainage. Three of these were built on Stratton Road, one on Park Street, one on Clement Road and one on the Creek Road.

The line and grade were furnished after a preliminary survey in each case, for sewer work on Temple Street, Woodstock Ave., East Washington Street, Killington Ave., Watkins Ave., Grove Street, Park Ave., Spruce Street, Vernon Street, Horton Street, Lafayette Street, Thrall Ave. and Birchwood Ave. In all cases these sewers were made to conform as nearly as possible with the proposed ultimate sewer system as worked out in 1925 by this engineering department.

A survey was made and detailed plans were completed for the possible enlargement of Trunk Sewer No. 1. This sewer has caused some trouble by bursting during extremely hard storms

due to the overload of water delivered to it by laterals and branch sewers.

Complete stadia surveys were made of Forest Street and Stratton Road. These are streets for which no map previously existed. The Stratton Road survey includes the location of all houses, fences, apparent property lines, etc., from Woodstock Avenue to the south city line.

The street oiling was supervised by this department, as were the compiling of accounts and the adjustment of claims made by property owners. As a record is made of these claims, it is expected that mistakes will gradually be eliminated and the payment of the bills thus simplified.

Street lines and grades were given whenever requested during the year.

The office work handled by this department, besides the preparation of plans for all construction work, includes keeping the records up to date and making plans of all underground sewer and water pipes that will in the future serve as a source of information when, for any reason, these lines have to be dug up.

The flood of November made necessary considerable engineering work. A detailed survey was made at the site of Dorr bridge and plans were prepared to be used by the State in designing a new bridge to be built at this location. The North Main Street and Adams Street bridges, also destroyed by the flood, have already been mentioned. Surveys and maps were made of Crescent Street bridge vicinity and of Mendon Brook just above the city reservoir. These served as a basis for considering what course to follow in repairing flood damage.

FLOOD REPORT

A precipitation of 8.47 inches in 38 hours starting about 9:40 P. M. on November 2nd caused the most disastrous flood conditions locally of which there is any record.

A reference to the town report of 1869 dismisses the flood of that date with a single sentence stating that one unimportant bridge was washed away.

At about 10 o'clock on the morning of November 3, it was noticed that the water in the trunk line sewers near their outfalls was coming up through manhole lids and hundreds of property owners complained of water backing into their cellars.

About 1:30 P. M. a telephone message from the Rutland Ry., L. & P. Co. said that Glenn Dam had broken.

In the meantime the water was rising rapidly in Moon Brook and before long the city employees were busy removing by boat the people who were isolated by the rapidly rising water in their homes along Clover Street, Strongs Avenue and South Main Street.

One of the two boats available was taken to Water Street and families were rescued from their homes there. The rain continued with unabated force and reports of damage to bridges, culverts and highways continued to pour in. The high water in East Creek had receded perceptibly by 7:00 P. M., Nov. 3rd, and probably started to lower about 5 P. M., although at 8 P. M. it was nearly over the top of the hydrant at the corner of Baxter and State Streets.

Many acts of self-sacrifice and heroism were performed by individual members of the Fire, Police and Public Works Departments, as well as by volunteer helpers, in rescuing people in the flooded areas.

During the night, refugees were brought to the Armory where food and clothing were provided and the National Guard turned out to assist in relief work.

By Friday morning the waters in the Otter Creek tributaries had fallen but Otter Creek was considerably higher, attaining a maximum rise of about 17 feet above normal in the vicinity of River Street. At 3 A. M. Friday morning the water was about 8 feet deep in Meadow Street.

A hurried checkup of damage done to the city showed that Dorris bridge, a wooden lattice truss of 201.45 feet in length over Otter Creek had gone out, that it had in all probability knocked out the Ripley Bridge, a steel truss bridge of two spans, having a total length of steel of 178 feet, which lay on the bed of the stream, that the concrete bridges on Adams Street and North Main Street, over Tenney Brook, were completely wrecked, that the bridge approaches to Baxter Street bridge, over Tenney Brook, Crescent Street bridge over East Creek, Jackson Avenue bridge over Moon Brook, Curtis Avenue bridge over Mussey Brook, were washed out so as to make them impassable. Reports kept coming in of holes and washouts all over the city, some of the major highway washouts being Campbell Road, Cleveland Avenue, Preville Avenue, Curtis Avenue, Jackson Avenue, Stratton Road, Killington Avenue and the Creek Road, with lesser damage done to High Street, Clinton Avenue, Baxter Street, Water Street, Lalor Avenue, the road to the city rock crusher and other miscellaneous places.

Communication with the outside world was practically shut off and many wild rumors of loss of life, property damage, etc., were rampant. Local electric light and telephone services were out of commission and this added to the confusion.

Work was started at once to open up the main lines of traffic. A temporary bridge was built on South Main Street and over North Main Street, and all available trucks and teams were started hauling fill to washouts. Temporary bridges were completed as follows:

South Main Street bridge, Saturday noon, Nov. 6, 1927.

North Main Street bridge, Sunday noon, Nov. 7, 1927.

Park Street bridge, Sunday night, Nov. 7, 1927.

Saturday morning after the waters had receded sufficiently to make it possible, an inspection of the land in the vicinity of the main reservoir in the town of Mendon was made, revealing serious damage there. The main stream from which we drew our water supply had made a new channel in places 400 feet distant from the old one, the intake channel was filled with debris, huge boulders were piled in chaotic confusion, the two small reservoirs were filled level full with sand and gravel, trees were uprooted and tangled with debris of bridges, houses and sheds, the chlorination house was washed from its foundations, and no water was reaching the reservoir.

A hasty survey was made, men started to work with picks, shovels, dynamite and sand bags, and by noon a temporary trench had been made into the reservoir providing an adequate though roiled supply of water, and then work was started to restore the regular intake. In the meantime an inspection of Gleason reservoir showed it to be filled level full with boulders and gravel. Chlorination of the water did not cease during the flood.

The Fire Department worked tirelessly day and night pumping out cellars after the waters had receded.

The indirect damage done to the city by the flood is hard to estimate, and there is undoubtedly some direct damage that has not yet been discovered, but I think that on the whole, we escaped remarkably well in comparison with Montpelier, Waterbury and other like places.

I would like to say a word in praise of those members of the Department of Public Works who, although their own homes and belongings were in the flooded districts, yet remained loyally on their jobs and worked for the general welfare rather than for their own.

Elevations were taken on the high-water marks in various parts of the city and the flooded area has been plotted on a city map showing as closely as could be estimated the high-water mark locations.

High-water marks on the Clarendon and Pittsford Railroad trestle over East Creek north of River Street, showed an elevation of 540.5 feet; on the banks of Otter Creek south of River Street 541.0 feet; near Baxter and State Streets 543.5 feet; near the highway bridge on Crescent Street, 548.0 feet; and in the vicinity of Clover Street 548.0 feet.

The property loss was extensive and the damage done to Public Works was in the vicinity of \$100,000.

Shortly after the flood waters had receded, another alarm was caused by heavy rains, and the property along Moon Brook between Main Street and Strongs Avenue was again threatened. The high water here was partly caused by a coffer dam in the railroad culvert just west of Strongs Avenue. This dam was placed to make possible repairs on the culvert, which was badly damaged in the previous flood. Prompt work, starting at midnight by the railroad employees and city employees removed part of the dam and let the water through just as it reached the first floor of house No. 126 Strongs Avenue.

A flood like that of November 3 and 4 may never occur again, and it may occur anytime. Whether from an economic point of view, it would be advisable to spend the money required to construct and maintain reservoirs adequate to control the flood waters, is a question that can only be determined by a detailed survey of the possibilities and probable costs.

Owing to the approach of winter most of the repair work at the water works head had to be postponed until next year, but enough work has been done to enable the water supply to function properly.

It was difficult to keep an accurate cost of the flood repair work as distinguished from other work, as they were going on simultaneously, but the effort has been made and is shown on detailed costs in the tables.

General	7,999 87
Water	1,330 18
Total	\$13,460 26

The following recommendations are submitted for your consideration:

That the city continue to lay at least one mile of permanent road surface each year; that curbs be built; that intersection of streets be hard-surfaced; that at least one mile of road each year be surface-treated with a heavy asphaltic or tar oil; that a power shovel and portable gravel crusher be purchased; and that grading, draining and graveling of less used roads be continued until the mud holes be done away with.

That the installation of manholes on sewers be continued until there is one manhole every 300 feet on any line and also one at every change in direction; that catch basins be installed where surface drainage requires it, and new sewers be installed as rapidly as may be on accepted streets where there have been none for years; that the capacity of the outfall sewers be in-

creased as soon as may be to accommodate the added load imposed upon them.

That the question of bonding for new sidewalks in 1929 be submitted to the people for vote in 1928; that more money be spent on sidewalk repairs, patching holes, etc.

That more filling and better guardrails be installed near culverts and bridges, and more attention be given to our parks and plots of city-owned ground at street intersections.

That the Water Department continue to construct its mains in accordance with the plan submitted to and approved by the New England Insurance Exchange; that more hydrants be installed; that wherever possible dead ends be connected; and that many valves be inserted in the mains where there are none.

That a survey and map be made of the newly purchased lands in Mendon and suitable markers placed on the boundaries; that the tree-planting program be carried on; and that the sale of lumber be continued as started under the advice of the State Forestry Service.

CONCLUSION

In finishing this report I wish to express my appreciation of the excellent work done by the employes of this Department, of the loyal support and interest shown by the Honorable Board of Aldermen, of the courtesy shown by the State Forestry and State Highway Department officials, of the understanding acceptance by the citizens of the city of unusual conditions caused by the flood, to the other city Departments for their consideration and co-operation, and to his Honor the Mayor, A. W. Perkins, for his ready comprehension of the problems met and his untiring and unselfish interest in the city's and the Department's mutual improvement.

Respectfully submitted,

RICHARD H. ROYCE,
Commissioner of Public Works.

Report of Commissioner of Public Safety

To the Honorable City Council:

I hereby submit my report as Commissioner of Public Safety for the year ending December 31, 1927.

POLICE DEPARTMENT

The Police Department is composed of the Chief of Police, twelve patrolmen, and about fifty special officers.

Three hundred and twenty-eight arrests for various causes were made during the year, thirty-eight more than in 1926. One hundred and forty-five arrests were for intoxication; sixty-five for violation of the automobile laws; thirty-eight for breach of the peace, and the balance for various other offences. Six hundred and six lodgings were applied for and given, this being an increase of two hundred and thirty more than the preceding year.

Eleven automobiles were reported stolen during the year, five of which were recovered. Seventy-six places of business were found unlocked by officers and owners notified. The patrol wagon answered one hundred and ninety-three calls, covering 9,075 miles at a cost of \$315.64, of which \$165.70 was collected in costs.

During the month of June automatic traffic lights were installed at the corner of Merchants Row and West Street, and on the corner of West and Wales Streets, at an approximate cost of \$675.00. It is the intention of the department to install other signals at the corners of Center and Wales Streets, and Washington and Wales Streets in the early part of the present year. Handsome signs erected by the Board of Aldermen at the intersection of South Main Street and Strong's Ave. and at various intersecting streets along Main Street directing tourists to and through the city, have been of much assistance to the police

department since their installation, and I trust that more of these may be provided during the year 1928.

An inventory of apparatus, equipment, etc., on hand shows a total of \$6,916.00.

The expenditures for the year are as follows:

Salaries	\$25,101 85
Other expenses	1,855 50
Total	\$26,957 35

FIRE DEPARTMENT

The Fire Department consists of fifteen permanent men as follows:

One chief engineer, one assistant engineer, two captains and eleven regular firemen, one steamer engineer and ten call men.

The apparatus consists of two triple combination trucks, one combination truck, and one new seventy-five foot aerial ladder truck, which was purchased to replace the old one which was considered unsafe. The department also has on hand 6,500 feet of 2½-inch and 300 feet of 3-inch hose.

In the past year the inside fire-alarm apparatus which had become obsolete was replaced by a new modern apparatus which will serve as an alarm for several years. We have fifty-four outside fire-alarm boxes and I would recommend additional boxes to districts not having same.

The fire and police wires on Merchants Row were all placed underground, and the poles removed from the street during the past year.

The department responded to 225 alarms as follows: Bell alarms, 29; telephone, 172; still alarms, 22, thermostat, 2; this being 15 alarms less than in 1926.

The fire loss for 1927 was the lowest in many years, the total loss being \$11,274.00, on which \$10,024.00 insurance was paid, there being a loss of \$1,250.00 not covered by insurance.

In the flood disaster all members of the department co-operated in rescuing many people who were in danger of losing

their lives. They also pumped out over two hundred cellars after the flood had subsided.

During the year the Chief made 1128 inspections and was instrumental in having many fire hazards cleaned up. One hundred thirty-four wiring inspections were made and the city has practically no defective wiring at present.

The following are the expenditures for the year:

Salaries	\$27,554 59
New truck	15,000 00
Fire-alarm apparatus	5,335 00
Insurance, merchandise, repairing, etc.	5,102 37
Total	\$52,991 96

Respectfully submitted,

B. J. COSTELLO,
Commissioner of Public Safety.

ALFRED H. KOLTONSKI,
Chief Engineer.

Report of City Attorney

To the Honorable City Council:

I herewith submit my report as City Attorney for the year ending December 31, 1927:

The duties of this office during the past year have been mostly of a routine nature, such as co-operating with and advising the special committee charged with the erection of the proposed New High School, and the special committee which negotiated the purchase of the Wheelerville property as an addition to the city watershed; also advising the Department of Public Works and the Health Department on matters which arose in connection with the flood disaster, and the drafting of deeds, contracts, agreements, etc., for the various departments of the City Government.

During the year 1927 there were no suits brought either for or against the city. At the time of my last report there was pending an appeal of the F. W. Woolworth Co., from the decision of the assessors in the matter of the appraisal of their property on Merchants Row. This matter was later arbitrated, to the satisfaction of all parties concerned.

I have co-operated with the Overseer of the Poor in the removal of several insane paupers to the Brattleboro Retreat and State Hospital at Waterbury, and also in various routine matters connected with the conduct of his office; also with the Tax Collector in the collection of delinquent taxes. I have attended several hearings before the Public Service Commission in the matter of bus line petitions.

Throughout the year it has been a pleasure for me to co-operate with and advise the members and committees of the Board of Aldermen, and the various city officials.

Respectfully submitted,

J. A. CROWLEY,
City Attorney.

Report of Overseer of Poor

I herewith submit my report as Overseer of the Poor for year ending December 31, 1927:

Appropriation	\$10,000 00

C. G. NOYES,
Inspector of Buildings.

Report of District Nurse

To the Honorable City Council:

I submit the following report as District Nurse for the year ending December 31, 1927:

Whole number of nursing visits 1,552; 54 prenatal calls were made, 39 maternity cases cared for, and 100 visits made in interest of Child Welfare. Worked 77 hours in flood relief work at the Armory.

Supplies of clothing and medicines were furnished 134 families, and 17 baskets sent to families at Thanksgiving and Christmas.

The expense for the year for salary, transportation and supplies was \$1,251.26; received from patients' fees \$529.

Respectfully submitted,

LUCIE P. CLARK,

District Nurse.

Report of Health Officer

To the Honorable City Council:

I submit the following report for the year ending December 31, 1927:

Contagious and infectious diseases reported:

Chicken pox	67
Whooping cough	60
Measles	602
Mumps	207
Scarlet fever	25
Diphtheria	1
German Measles	11
Pneumonia	6
Poliomyelitis	1
Total	980

Plumbing inspections 32

There have been 79 samples of milk sent for examination, of which only a few have shown any dirt, the average being better than last year.

I have sent samples of water to the Laboratory daily, except Sundays and four days at the time of the flood. The returns show the water is in good condition.

Respectfully submitted,

GEO. RUSTEDT, M.D.,
Health Officer.

Report of Department of Public Health

Statistics for 1927 compiled from certificates filed in the City Clerk's office.

Report of Board of School Commissioners

*To the Mayor, Board of Aldermen and Citizens of the City of
Rutland:*

The Board of School Commissioners herewith submits its report for the fiscal year ending December 31, 1927.

For five or six years the most pressing school problem of Rutland has been the provision of suitable and adequate accommodations for high school pupils. The Board of School Commissioners has given first consideration to this question and has welcomed any assistance or guidance which would lead to a solution. In January, 1925, the "Mayor's Committee" presented a proposal for the erection of a new structure adjacent to the present building and designed to articulate with it. This proposal was rejected by the voters but served to fix public attention on the need of a better school plant.

In November, 1926, Hon. Clarence H. Dempsey, Commissioner of Education for Vermont, was invited by the Board of School Commissioners to make a study of our school building problem and present a report to the citizens of Rutland, which he did the following December. Mr. Dempsey, in a masterly treatment of the subject, recommended that a new building be erected on a new site and that authorization be sought "to make needed repairs, improvements and renovations of the present high school building."

At the 1927 March election the voters authorized the City Council to issue bonds for \$400,000 to be used for the purchase of a new site and the erection, thereon, of a high school building, and approved a special Building Committee, consisting of Newman K. Chaffee, chairman, Henry G. Smith, Frank H. Duffy, Lathrop H. Baldwin, John C. Flynn and Mayor Arthur W. Perkins, to have charge of the project. As a result of favorable

circumstances and sagacious action, this committee was able to secure a seven and one-half acre tract on the east side of the "Baxter Estate" on Church Street, which gives ample room not only for a building, with plenty of space for an athletic field but insures the city against added expense for land in the event that expansion becomes necessary.

The committee has let favorable contracts for the erection and completion of the building and has reserved a sufficient amount of money for equipment and furniture. The general contractor has the foundation well toward completion and promises a building ready for delivery October 1, 1928. The total cost of the building, site and equipment will be fully covered by the appropriation of \$400,000 and will be distributed about as follows:

Site (a little over 7½ acres)	\$40,000
General contract	240,013
Heating, ventilating and plumbing	47,210
Electrical work	13,153
Equipment	35,000
Architect and other expenses	24,624
Total	\$400,000

The Board of School Commissioners interprets the reaction of the people of the city to the various proposals which have been before them to indicate a desire to utilize the present high school building to the best possible advantage. Acting in harmony with this attitude, we began to plan our repair program in such a way as to spread the cost of alterations and repairs over a sufficient period of time so that neither an increase in taxation nor a bond issue would be necessary. We are able to assure the public that this program is possible if no change is made in the basis of our income. Our plans contemplate improvement of the south wing (by changing partitions) to make six standard class rooms available, the installation of wardrobe space to meet the needs of the school, certain alterations and improvements in the assembly hall to make it more useful and

safe, redecoration of the interior, and improvements in the electrical service and fixtures.

In December, 1926, we estimated our expenditures for the fiscal year 1927 at \$159,347. Actual expenditures for the year were \$152,322.38 but the sum of \$6,977.68 in deferred payments on teachers' salaries should be added to determine the school costs of \$159,300.06. On account of the extraordinary repairs and alterations planned on the old high school building, the purchase of the Dana School playground, normal increases in salaries and increased cost in operating an additional building, we estimate our expenditures for 1928 at \$181,890. The favorable balance left in the hands of the City Treasurer to our credit and the increased income from the tax on intangibles will, we expect, under present conditions, produce an income sufficient to meet this budget. It will, of course, be necessary to ask the voters to approve an additional tax in excess of the Charter limitation for the same amount as in 1927.

We expect that the extraordinary repairs, alterations and new furniture at the old school building will cost about \$16,000. Our total budget is, therefore, in excess of a normal expenditure.

The fact that it requires about one-third the total income of a city for current expenses of the schools has been observed in so many municipalities that this division has come to be regarded as a fair and equitable distribution of public funds. Our experience in Rutland tends to support this general law because the relation between current expenses for schools and total income from taxation for all purposes has been nearly constant and averages just about one-third over a period of years.

Year	Tax Rate for schools	Tax Rate for all purposes
1920	\$0 75	\$2 50
1921	85	2 80
1922	85	3 00
1923	1 00	3 15
1924	1 00	3 35
1925	1 05	3 10
1926	1 05	3 20
1927	1 15	3 60

We find justification for the assertion that school costs in in Rutland are well within reason by a comparison of per pupil costs of high school education as recorded in the Biennial Report of the State Board of Education of Vermont for 1926. The basis for computing the per pupil cost in this comparison is membership while our report for the past two years has been based upon average daily attendance. The use of the latter basis raises the recorded cost per pupil.

COST BY COUNTIES

Addison	\$85 00
Bennington	133 00
Caledonia	40 00
Chittenden	109 00
Essex	68 00
Franklin	112 00

Brattleboro	90 00
Fair Haven	124 00
Barre	58 00
Montpelier	132 00
Springfield	152 00
Rutland	90 00

We urge that every citizen of Rutland inform himself concerning the schools of our city in order that he may become an ardent supporter of any program which is proposed for the bene-

fit of our children. Our sole purpose is to manage the schools, as your agents, in such a way that the children of today may be able to meet the problems of tomorrow with tolerant zeal and an abiding faith in the institutions which have made the United States a leader among the nations of the earth.

Respectfully submitted,

BOARD OF SCHOOL COMMISSIONERS

By Lathrop H. Baldwin, President.

Rutland, Vermont, February 1, 1928.

Report of the Superintendent of Schools

To the Board of School Commissioners, the Mayor, the Board of Aldermen and the Citizens of the City of Rutland:

I have the honor of submitting to you the thirty-fifth annual report of the Rutland Public Schools and the seventh under the present administration.

The year just closed has been one of the best in the history of the public schools of Rutland, because public support and confidence has been marked and because the fixed policy of the schools to provide for the growth, development and larger success of the children has been continued. Enrollment in December, 1927, was just forty more than in December, 1926, reflecting healthy growth in general population and diffused prosperity. Marked progress has been made in the improvement of buildings, in furnishing more and better equipment for the use of teachers, in instruction and most important of all, in the professional zeal and intelligent activities of the teaching staff. Without claiming for our young people virtues they do not possess, it seems susceptible of proof that their attitude toward school and interest in it, indicates that the multitude of articles about the "waywardness of youth" are based, not on fact, but upon a ready sale for such material.

While we assign a major portion of our time and attention to the so-called "fundamentals" we feel a just pride in the dividends which accrue to the city by reason of our instruction in music, in domestic science and drawing, in our commercial department and in physical education and hygiene. These dividends are in terms of right attitudes and fundamental skills, habits of industry and thrift, and appreciation of the beautiful and useful.

The social problem concerning wise use of leisure time is solved for many children by having built up in them a set of

life values in the field of music. The instruction in the early grades opens the door to the musical world and a sense of rhythm and appreciation is developed which entirely escapes the notice of the thoughtless. In the upper grades where individual taste and a degree of specialization are important factors, the work in music is modified to meet the situation. The high school orchestra of sixty members, with twelve instruments represented and an ardent desire on the part of other pupils to qualify for membership, is sufficient evidence of its popularity and value to the boys and girls. When one considers the character of our yearly musical productions, the number of young people benefited, and the uniform excellence of the results a considerable degree of satisfaction seems excusable.

As a result of a special effort made last year to explain the advantages of the courses offered in drawing and home economics, many more girls than heretofore have been enrolled. The development of taste with respect to home decoration and personal dress is certainly as important to the average individual as the binomial theorem. One hundred twelve girls in the high school devote nine periods a week to study in this field and two hundred girls in the intermediate school devote an average of 147 periods a year to the more elementary phases of the work. The important consideration in this department is not so much the excellence of the article produced as it is the effect on the girl while she is producing it. Fundamental life values and skills acquired are the measures of success. The girl who brings to completion a project of her own choice, builds into her system a thrilling sense of achievement which results in self-respect and zeal for accomplishment.

For many years the commercial department of the high school has provided a practical incentive for young people to remain in school; and at the same time has met the needs of the business interests of the city. Last spring Mr. Frank C. Phillips, head of the department, made an exceedingly interesting study concerning the "Present Employment of the Graduates of the Commercial Department of the Rutland High School for Ten

Years." He says, "Of the 189 commercial graduates, 112 are still in office or business where their commercial training is of value; 127 are still in Rutland." His general summary shows that the 189 graduates are employed as follows:

In office work (in offices of various kinds)	92
In store work (as clerks or salesmen)	16
Own their stores	2
Traveling salesmen	2
Telephone operators or supervisors	8
In various professions (teachers, dentists, etc.) ...	5
Nurses	9
Miscellaneous	3
Farmers	2
At school (including 3 Post-Graduates)	7
At home	6
Married and not in positions	24
Not accounted for	13

189

While the aim of the commercial department is vocational in that it fits a young person to earn a livelihood, it is at the same time cultural because more than sixty per cent of the time spent in high school is devoted to regular academic subjects. It is the concensus of opinion of business men that the graduate of a four-year high school commercial department has a much better chance of being an asset to his employer than has a person with a shorter course. The employers contend that the general training in English, history, science and other subjects qualifies a young person to meet the requirements in all positions where initiative and a broader social outlook are important factors.

The response to public interest in physical education and hygiene has been shown in a yearly increment of effort on the part of teachers, principals and such part-time workers as we employ. The most noticeable improvement is in the number of children who actually participate in contests and recreational

activities under the direction of the schools. The "setting up" exercises employed in the earlier grades furnish a welcome relief to the children from the tedious seat work and improve the quality and quantity of such work by dissipating the poisons due to fatigue. A large percentage of both boys and girls at the intermediate school engage, on regular schedule at certain seasons, in play activities which introduce the element of contest, developing leadership and satisfaction in achievement. At the high school the girls of all classes now have an opportunity to participate in various sports under wholesome conditions. Their response to the privilege of engaging in healthful activities and the improvement in poise and physical well-being are proof of the value and need of such an enterprise. The introduction of intra-mural games has made it possible for many girls and boys to find means of self-expression and development.

It is interesting to note that there has been a carry over all these years from the work of the "Teacher of Physical Culture" who was employed from 1899 to 1905. Our program of physical education and hygiene so well begun will receive added impetus when the facilities provided in our new building are available.

The Board of School Commissioners employed a teacher of Manual Training from 1906 to 1919 and to supplement this work, employed a teacher of Wood Working from 1911 to 1917. It will be a matter of satisfaction to many citizens to know that it will be possible to resume this work when the new school building is completed. The success of our domestic science department with the girls of our city leaves no doubt of the success of a parallel department for boys.

Your teaching and supervisory staff is daily attempting to arrange affairs so that matters which are intrinsically important shall make the deepest impression on the school children. We are more interested in the growth and development of the individual than we are in any particular fact or skill.

Since the progress of your children is of major importance to you, we feel at liberty to urge you to study school problems

and become acquainted with school procedure in order that the children may not suffer any loss by our failure to co-operate.

Respectfully submitted,

W. W. FAIRCHILD,
Superintendent.

Rutland, Vermont, February 1, 1928.

Report of Auditors

To the Honorable City Council:

Your auditors have audited the books of the City Treasurer, City Clerk, Overseer of the Poor, Superintendent of Schools, and Sinking Fund Commissioners from January 1, 1927, to December 31, 1927, inclusive, and *we hereby certify* that, in our opinion, they have duly accounted for all monies received by them and that they have proper vouchers for all monies expended.

We find the records of disbursements as shown by the City Clerk and Superintendent of Schools in agreement with the entries on the books of the City Treasurer. We have checked the cash and verified the bonds, deposit books and securities in the hands of the City Treasurer and Sinking Fund Commissioners, and found them to be correct.

The books and records of the City Treasurer's office are in their usual excellent condition and very clearly show the city's true financial condition on December 31, 1927, and the result of operations for the twelve months' period then ended.

Respectfully submitted,

EARLE T. TOWER,
GEORGE A. SABIN,
JOHN W. BURKE,
City Auditors.
